BRAU
Beviiale **2007**

 **ELETTRIC80**

As a company, we are always looking to improve our proposition and offer the industry solutions which focus on reliability, flexibility, efficiency and cost savings. Our technology and systems are driving a revolution in the beverage sector as more and more companies turn to end-of-line automation for operational efficiencies. Our solutions are installed quickly and with minimal disruption to production. Once deployed, our customers benefit from a safer working environment and increased storage capacity.

Our ethos is to look to the future and to work with customers to establish innovation. If you would like to learn more about our approach visit hall 7a at BRAU 2007. We will be showcasing our latest automation technology in storage, feeding systems, block

stacking and high lifting LGVs. If you drop by we will be delighted to listen to your specific requirements and tell you more about our sector expertise and experience. We work with some of the biggest brands in the sector and are currently installing solutions at Damm, Carlsberg and Foster's.

"As a global provider of end-of-line automation solutions we help our customers increase operational profitability and efficiency – put simply our technology helps companies cut cost and move product out of the warehouse in a fast and effective manner. We are continually implementing solutions for the world's leading beverage companies and distributors. There is no doubt that LGV-based storage systems are becoming more prevalent globally."
